# SAFARIO

WE MAKE FABRICATING EASIER

Safario's fabrication facility in Dubai, United Arab Emirates employ the highest technology and most advanced custom metal fabricating equipments available. Combine this leading edge equipment with Safario's dedicated & professional employees the result is best-in-class quality products manufactured at the lowest total cost.

From custom metal fabrication to turnkey assembly work, Safario provides you with a completely integrated custom manufacturing environment. When you become our client, we work together to fully understand your specific needs and then develop a complete solution to meet them all. Best of all, you save time and money because in-depth engineering assistance, design work, parts manufacturing and even complete assembly are all available to you from a single source.

## OUR VISION & MISSION

Our mission is to become a world-class supplier of metal fabricated products and services.

[www.sheetmetalfabricationuae.com](http://www.sheetmetalfabricationuae.com)

## QUALITY MANAGEMENT SYSTEM

The quality management system followed is based on the well defined and documented procedures that meets all the drawing and process requirements.

### Highest Quality Control Standards -

Our Inspection Department is equipped with the finest measuring instruments and employs Statistical Process Control (SPC). We meet or exceed all dimensional requirements. All instruments are calibrated and traceable.

## INDUSTRIES SERVED

Construction / Marine / Energy / Environmental  
Display & Storage / Electrical / Electronics  
Industrial Automation / Interior Fit Out

## FACILITY

We have fully computerized state of the art sheet metal processing machinery from USA, Japan, Europe, India and Far East. Safario is equipped with advanced manufacturing facilities which lead to high quality finished products. Its commitment to the technological innovation is exemplified by the degree of automation throughout the business. A network of computers co-ordinates Engineering, Design, Production and Customer Service activities. This is combined with latest custom made program so that the utilisation of manufacturing resources of the company is optimized to benefit its customers.

The sheet metal shop is equipped with CNC machines for mass production of complex sheet metal parts. The punching head has a combination of 58 stations and the modes of operations include punching, forming, notching, shearing, louversing, cutting etc. The sheet metal shop has CNC Press Brake for bending intricate profiles and CNC shearing for precise cutting in mass production.

## PRODUCT PROFILE

Stainless Steel Cladding / Aluminium Claddings  
Sheet Metal Perforation / Elevator Panels  
Display Stands / Electrical Panels / Enclosures  
Decorative punching / Junction Boxes / Cable Trays

## CAPABILITIES & INFRASTRUCTURE

CNC Turret Punch Press / CNC Press Brake  
Laser Cutting / Water Jet / Plasma / CNC shearing  
Drilling / Tapping / Grinding / Welding TIG/MIG  
Weldments / Mechanical Assemblies  
Sheet Perforation / Powder coating / PVDF Coating  
Wet Painting / Custom Assembly Capabilities

## FABRICATION

Safario's fabrication facility in Dubai, United Arab Emirates employ the highest technology and most advanced custom metal fabricating equipments available. Combine this leading edge equipment with Safario's dedicated & professional employees the result is best-in-class quality products manufactured at the lowest total cost.

Safario's unique process provide an ideal solution to leading OEMs in the Construction, HVAC, Interior fit out, Energy & Environment, Industrial & Electrical Electronics, Marine to name a few. Safario is truly the one source solution from start to finish and our metal fabricating strength is evidenced by the myriad products that we manufacture for the various Industrial application. Along with Process Engineering and development services, Safario maintains an extensive manufacturing Infrastructure.

Our facilities make it possible to offer conventional and CNC machines for Punching, CNC Bending, Shearing, Lazer cutting, Plasma and Water Jet cutting, Forming, Drilling, Tapping, Grinding, Welding, Assembly and Logistic Services. We also provide a broad range of finishing capabilities including Sand Blasting, Powder Coating, Kynar PVDF Coating and Wet Spray Painting.

From custom metal fabrication to turnkey assembly work, Safario provides you with a completely integrated custom manufacturing environment. When you become our client, we work together to fully understand your specific needs and then develop a complete solution to meet them all. Best of all, you save time and money because in-depth engineering assistance, design work, parts manufacturing and even complete assembly are all available to you from a single source.

The background of the entire page is a photograph showing several pairs of hands working on large sheets of paper covered with technical drawings and blueprints. Some hands are holding pens or pencils, and one hand is using a ruler. The focus is on the hands and the drawings, with a dark grey text box overlaid on the right side.

## DESIGN & ENGINEERING

Selecting the right design and engineering team is essential to a customer's success when bringing a new product to market, or when re-launching an existing product with new features. Key success metrics for our customers are time to market and cost to market, which can be negatively impacted if the design proves difficult to manufacture when volume demands hit. A design partner that is well integrated with the manufacturing team will help minimize the risks of time to market and cost to market.

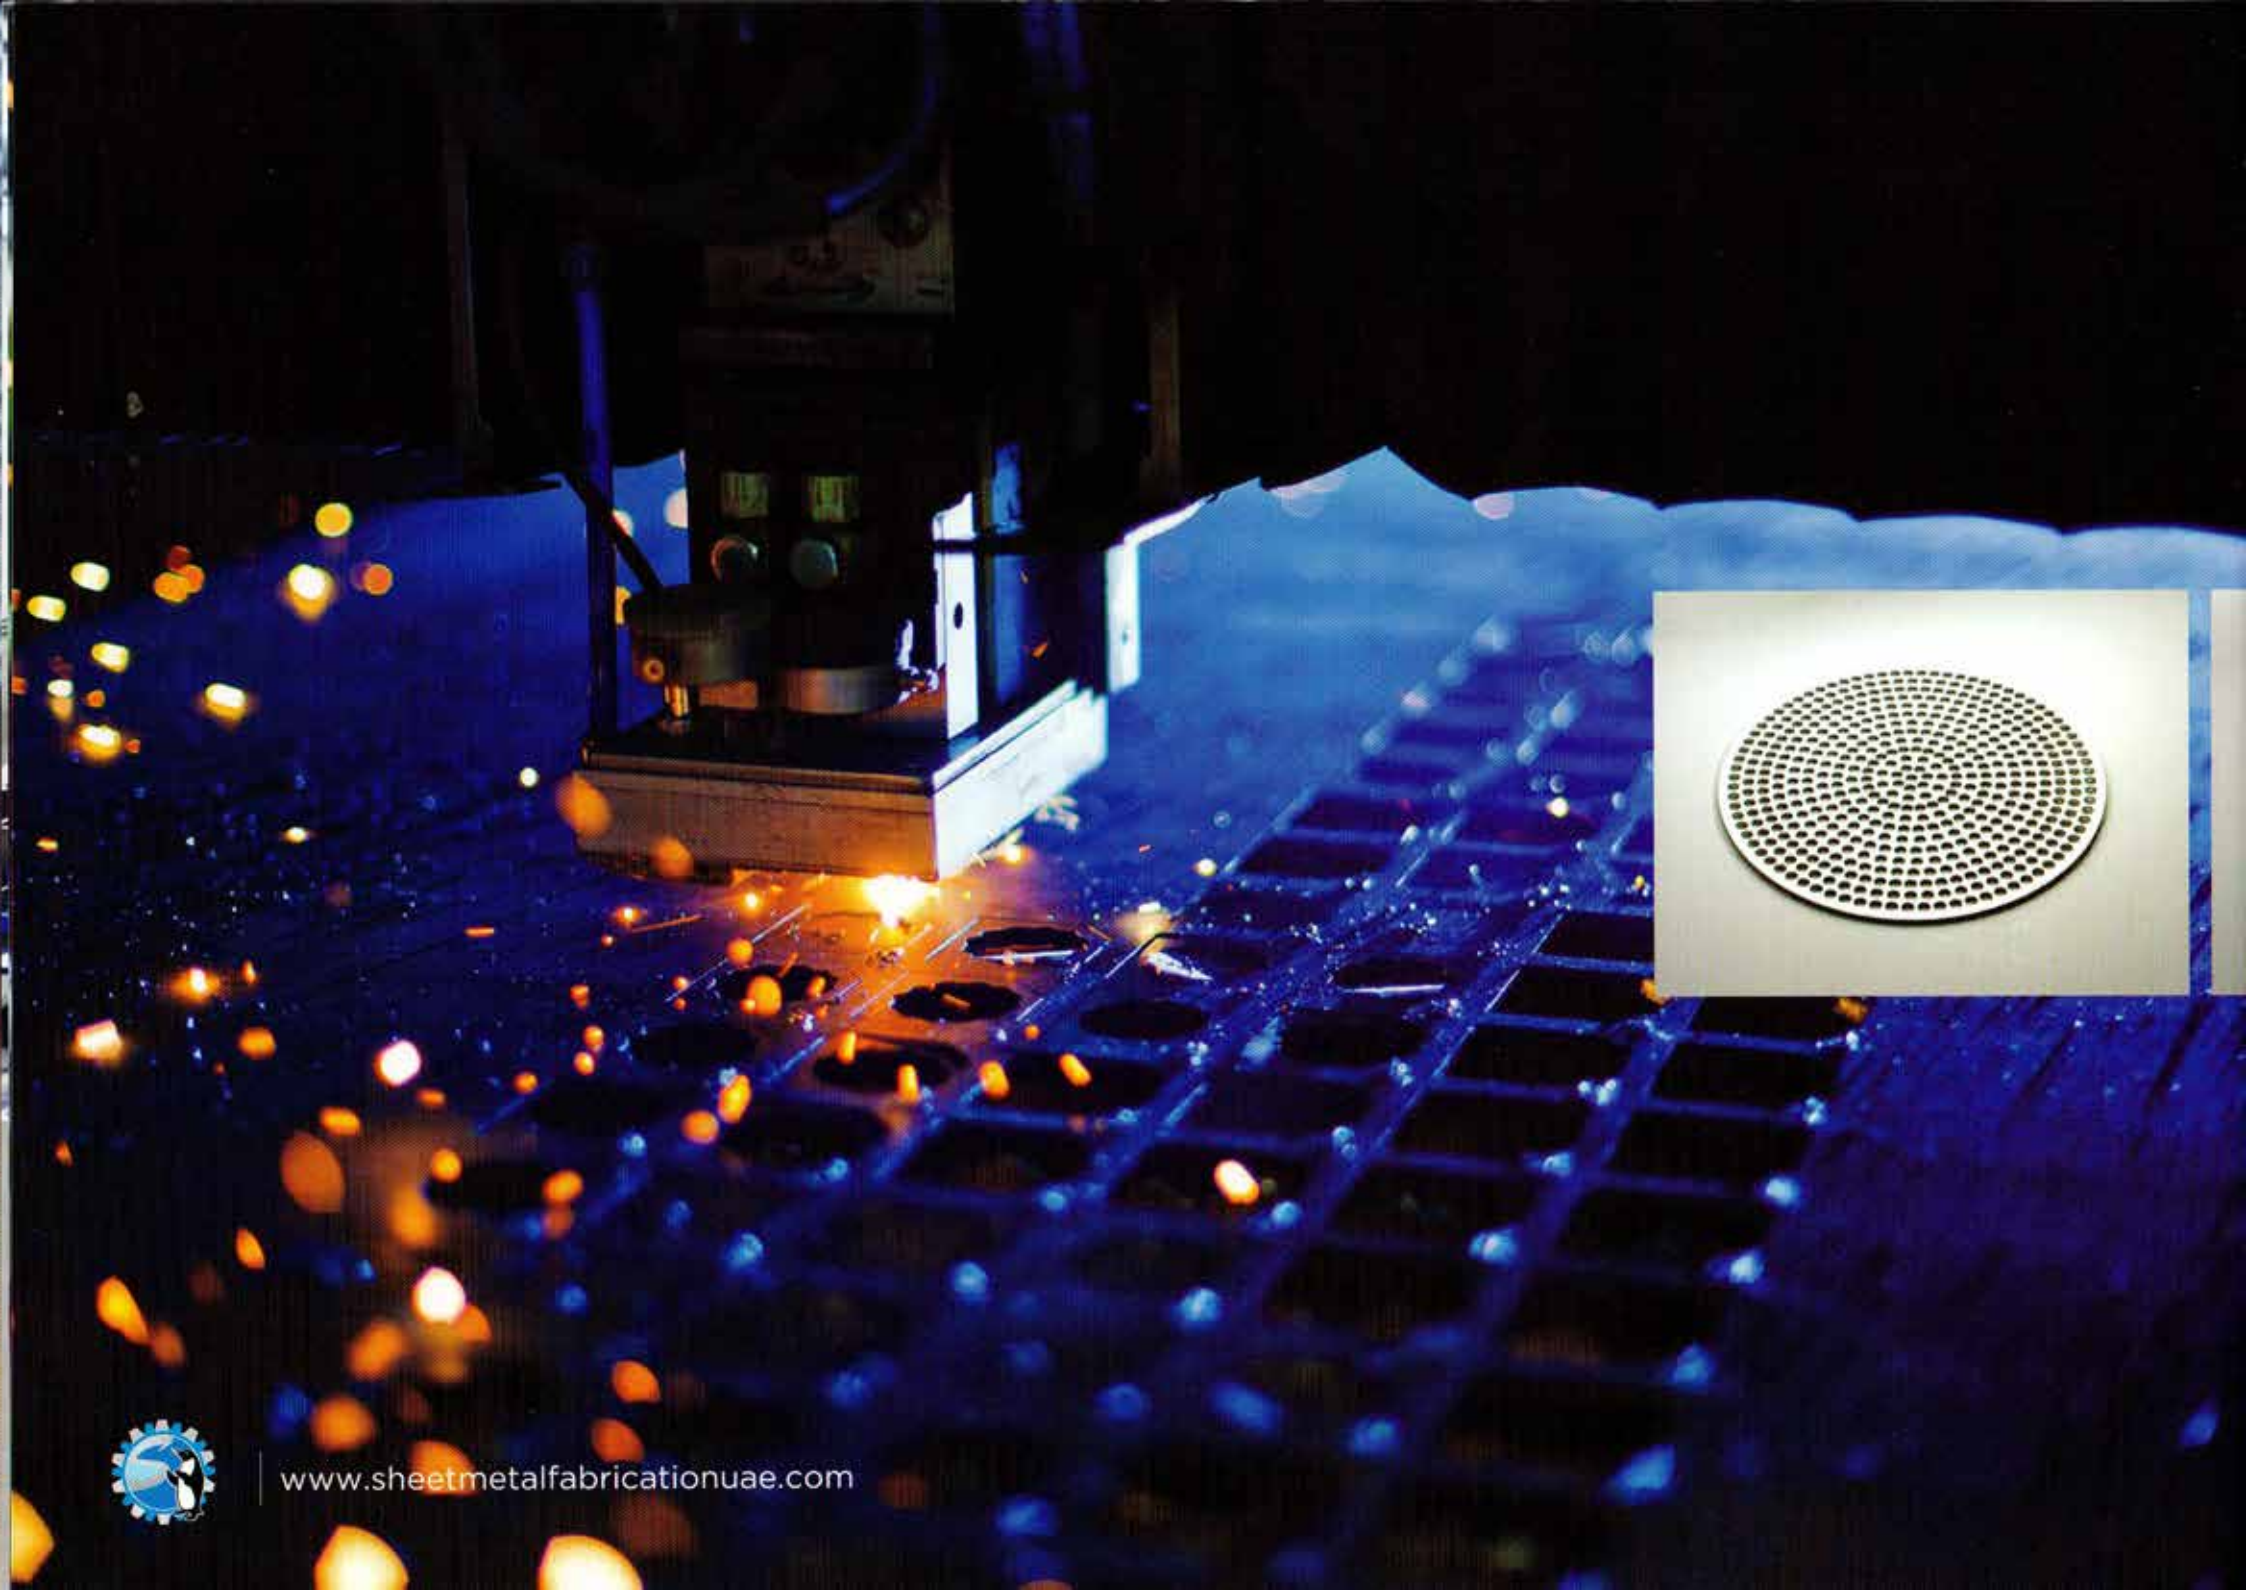

At Safario, we are committed to providing an extensive range of turnkey and value-added design and engineering services that complement our full system, integrated manufacturing solutions strategy.

We are equally committed to protecting a customer's intellectual property (IP), which is particularly important in the new product development phase for competitive and time-to-market reasons.

Our design and engineering teams bring value to the product development process by being involved at virtually every stage of the design cycle - from concept through detailed design and prototyping to volume production and end-of-life support. Our value-added services have proven to reduce cost and accelerate time to market.

## SHEET PERFORATION

We do perforation on Stainless steel, Aluminium, Mild Steel and Hot Rolled steel. Perforated sheets can be used to benefit in many solutions, Eg: Noise and weight reduction, Air Control, Filtration, Decorative finish or for anti - skid flooring etc. The varied qualities by perforated sheets make them ideal for sorting, facades, ceilings, lamps, shelves, shielding, stairs and many other applications.

## Availability of Tooling

We have different patterns of tools available and ready for production. Special profile tools also can be made available within a short Lead time, enabling us to supply perforated sheets and customised products. We do:

Round Hole Perforation / Square Hole Perforation / Slot Hole Perforation / Hexagonal Perforation  
Bridge Hole Perforation / Decorative Perforation / Embossing / Louvering

## CONTRACT MANUFACTURING

Safario's Mechanical Systems & Services Division offers a complete range of design engineering, prototyping, volume manufacturing, assembly and test services for complex electro-mechanical systems across multiple vertical markets.

We provides a complete range of services including the design and manufacturing of:

**Sheet metal enclosures / Gasketting / Bought out item Integration / Welded frames / System integration**

Key segments include Communications, HVAC, Construction, Industrial and Clean air technology. We support large form factors, diverse materials (sheet metal), complex mechatronic assemblies.

We provide a complete and cost-effective solution for the design and manufacture of electro-mechanical systems. By providing integrated components, technology and manufacturing services, customers gain the benefit of supply chain consolidation, manufacturing efficiency and lower costs.

Our mechanical systems and services solutions drive down costs, decrease time-to-market and improve competitiveness. Partnering with us brings the benefits of sourcing both component production and assembly services with a single manufacturing partner.
